

[Koha Online Catalog Details For: Getting Started With Stata For Mac](#)

The screenshot displays the Viking Recorder application window. The main view shows a browser window with a video of Earth from space. A recording overlay is visible on the video, with a tooltip that says "Position camera overlay by dragging it, resize it by dragging its corners." Below the video, a progress bar shows "0:16 / 1:06".

On the right side, a "New Recording" dialog box is open, showing various settings:

- Codec:** Ultra
- Forma:** Very High
- Frame Rate:** High
- Quality:** Medium High
- Bit Rate:** Medium Low
- Frame:** 1080p (Full Size)
- Audio:** Track 1: Built-in Microphone, Level: 100, Track 2: No Audio, Level: 0. "Save as Separate Tracks in Movie File" is checked.
- Capture Area:** Custom Area (1920x1080). "Capture Entire Screen" and "Screen: Color LCD" are also visible.
- Overlay Webcam:** "Webcam Overlay is Always Top-Right (in Capture Area)" and "Manually Position Webcam Overlay" are checked.
- Preview:** A small preview window shows the current recording area.
- Buttons:** "Pixel scale @ 2.0x = 1766 x 942 movie", "Cancel", and "OK".

Additional text boxes on the screen include:

- "Great for archiving videos from the web"
- "The in-app preview and quality presets help you along in your quest for that perfect screen recording!"
- "Ultra High Definition (4K) Crew Earth Observati..."
- "Specify an area to grab by dragging this box and/or adjusting its corners. Click the 'X' when done."
